

# Decide on features

## Refined Features

### 1. Inventory Tracking

- Comprehensive tracking of physical and digital items.

### 2. Intelligent Suggestions

- Provide recommendations like outfit combinations or relevant files.

### 3. Notifications for Maintenance

- Alerts for tasks like cleaning furniture, upgrading software, or renewing licenses.

### 4. Search & Filter System

- Advanced search functionality with customizable filters (e.g., by category, tags, or attributes).

### 5. Usage Analytics

- Insights into item usage patterns and decluttering suggestions for underutilized items.

### 6. Data Backup & Sync

- Automatic cloud backups and seamless syncing across devices.

### 7. Visual Storage Mapping

- Virtual maps of storage areas and hierarchical item placement (e.g., "Bedroom Closet > Shelf A").

### 8. Budget & Expense Tracking

- Monitor spending on categories and track expenses for new additions.

### 9. Customizable Dashboard

- Personalize the user interface to display favorite categories, quick actions, and important notifications.

### 10. Voice Assistant Integration

- Enable voice commands for managing inventory (e.g., "Where is my hiking gear?").

#### **11. Item Depreciation or Lifecycle Tracking**

- Monitor the expected lifespan of items and notify when replacements or repairs are needed.

#### **12. AI-Powered Insights**

- Provide intelligent insights, such as upgrade recommendations or buying suggestions.

#### **13. Wishlist Management**

- Track desired items and send notifications for sales or stock availability.
